Subject: RE: Questions regarding Treasure Island

Andre—

I received your e-mail and also your voice mail from last night on behalf of yourself and Felita Sample. Under CERCLA, the Federal Facility, in this case, Navy, is primarily responsible for leading and conducting community involvement outreach activities at their Superfund Sites. They are required to develop, implement, and periodically update a Community Involvement Plan, also known as "Community Relations Plan" according to EPA Guidance. The most recent Plan I can find on their website was updated in 2014. This document outlines the activities they do to inform the community of the contamination. I will need a couple more days to research our EPA records to obtain a complete copy of this document (or search for any more recent version) to gather more information about who they notified and how. In the meantime, I suggest you also contact the Navy to request more information about their outreach program and if these agencies are on their mailing list.

Many of the agencies you listed participate in regular cleanup team meetings as well. For example, representatives from the California Department Of Public Health, the City Of San Francisco, the San Francisco Department of Public Health, and TIDA are not only aware, but regularly contacted by the Navy regarding the investigation and cleanup status, and often participate in the Navy Project Team meetings.

The letter I mailed to Felita Sample included printouts from the Navy website showing some of the history of the community involvement activities that have been conducted by the Navy over the years. For example, Newsletters, Public Notices, Public Meetings, and many other outreach activities have been conducted for decades. I included a couple of the older newsletters (2005 and 2011) that state they have been conducting Restoration Advisory Board meetings since July 1994. There also have been many news and press releases about Treasure Island contamination over the years aside from the information the Navy has provided.

The Navy also keeps a document repository for the public on Treasure Island and at the San Francisco public library, and also keep an administrative record on-line that is available for the public to get more information.

Information Repository**Department of the Navy, BRAC Program Management Office**

1 Avenue of the Palms, Suite 161 (Treasure Island), San Francisco, CA, 94130

Hours: Monday-Friday, 8:00am - 4:00pm

San Francisco Main Library Science, Technical, and Government Documents Room

100 Larkin Street, San Francisco, CA, 94102

Hours: Mon, Wed, Fri, Sat 10:00am - 6:00pm

Tues & Thurs 9:00am - 8:00pm

Sun 12:00pm - 5:00pm

High interest environmental documents are currently provided on this website for a temporary basis. For additional environmental documents, please visit the local Information Repository or the regional Administrative Record. A link to documents in the Administrative Record is provided below.

Can You Please Send Me A List Of Agencies And People Who Knew That Treasure Island Was A Superfund Site? Does The List Include HUD, Shelter Plus Care, The City Of San Francisco, The California Department Of Public Health, TIDA, TIHDI, Catholic Charities, The San Francisco Roman Catholic Archdiocese (Whom Is The Landlord), And The San Francisco Department Of Human Services?

Andre,

Thank you for your phone call asking about Treasure Island. For over 20 years, the Navy has been conducting investigation and cleanup of hazardous waste and other toxic contamination at the former Treasure Island Naval Station. They are doing this work under the oversight of the State of California following the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), commonly known as "Superfund." In that sense, it is a "Superfund Site, however, Treasure Island is not listed on the National Priorities List (NPL), which is often also used to identify a site as a "Superfund Site."

Below is the EPA ID number for the Site, and the link to the website showing the status.

EPA ID	Site Name	City	County	ST	NPL Status
CA7170023330	TREASURE ISLAND NAVAL STATION	SAN FRANCISCO	SAN FRANCISCO	CA	Not NPL

<https://cumulis.epa.gov/supercpad/Cursites/csitinfo.cfm?id=0902776&msspp=>

You may be interested in one of the more recent cleanup activities on-going at the Gateview Avenue Neighborhood, this is listed on the Navy's website for the Treasure Island cleanup:

https://www.bracpmo.navy.mil/brac_bases/california/former_ns_treasure_island/treasure_island_residents_tenants.html

For more information about the contamination and cleanup at Treasure Island, please contact the Navy and State of California Department of Toxic Substances Control (DTSC) representatives:
